

Objective of the Humanity Front

The primary objective of the Humanity Front is to bring politics into the service of humanity. Ideal politics should be rooted in the values of humanity, striving for the welfare, justice, equality, and protection of human rights for every individual in society.

This Front is not merely about attaining power but is committed to providing equal opportunities, rights, and respect to all sections and communities.

The goal of the Humanity Front is to base politics on the principles of transparency, honesty, and the protection of human rights, thereby eradicating inequality, poverty, and discrimination. It aims to work not only at the national level but also on a global scale to safeguard the rights of neglected and struggling communities.

We firmly believe that politics should not be a mere game of power but a powerful movement grounded in the values of humanity, dignity, and equality. Humanitarians should actively participate in politics to nurture both politics and humanity. If humanitarians become active in politics, they will prioritize societal welfare, human rights, and justice, leading to the upliftment of both politics and humanity.

We strongly declare that if you are involved in or support any inhumane acts, we neither want your support nor collaboration. However, we remain entirely committed to your well-being because we can never be inhumane ourselves.

In Summary: The Humanity Front is striving to make politics a means of humanity, building a just, equal, and prosperous society.
